

## A SIMPLE BUILDING ACCESS SOLUTION

### Keep your facility, employees, and visitors safe

Driver cages are a simple, cost effective way of controlling access to distribution centers, buildings, or factory floors. Wire mesh partition surround the building-entry door, creating a safe and secure vestibule.

Equipment and operations in factories, warehouses, and distribution centers pose risks for everyone, especially visitors. Driver cages help you reduce risk by keeping unaccompanied visitors safely confined at the building entrance.

Standard and custom sizes are available in both free-standing and building-attached styles.

### Special offer!

- 3-sided, 8' x 8' enclosure, 8'-5" tall
- Includes (1) 3'-0" x 7'-0" hinged door with key lock and push bar
- 24" x 21" slide-up service window with writing shelf
- Powder-coated gray paint
- All assembly hardware and anchors included

Optional steel benches, key-less entry card readers, ceilings, and special paint colors available.

Need help measuring? Don't want to install it yourself? We can help, just ask!

Protect people, secure product, and maintain a safer facility with a driver cage.

### Complete 8' x 8' enclosure
