SECURE VALUABLE MATERIALS

Provide quick, secure access to high-value items on your shop floor

High-value materials, tools, equipment, and supplies need to be readily accessible in modern production facilities. Keeping these goods secure is a challenge for many organizations. Trips to tool cribs or secure storage areas add wasteful movement; line-side storage creates security risks.

Strong Hold single and double shift cabinets are built to secure tools, materials, and equipment anywhere on your shop floor. Built with 12 gauge steel and backed by an industry leading 99-year warranty, they stand up to the tough conditions in manufacturing facilities.

It's not just a steel box

1. **One-piece body** construction minimizes welds and increases strength.
2. **12-Gauge interlocking doors** feature a 210° range of motion
3. **Cast-iron handle** with integrated pad-lock hasp is strong and secure
4. **8-Gauge hinges** are built-to-last and eliminate door sag
5. **7-Gauge legs** provide 6" sweep for easy cleaning and 3/4" lag holes for improved security
6. **3-Point locking system** improves overall security
7. **Galvanized shelves** bring more light into the cabinet, making it easier to find things

We keep your business rolling.
